Crop Production and Management

The science that deals with the cultivation of plants and rearing of animals for human use is called agriculture. When plants of the same kind are grown on a large scale, they are called crops. The crops are divided on the basis of the seasons in which they grow:

Kharif Crops- These crops grow in the monsoon season, in the month of June, and harvested in the month of September. Paddy is the main Kharif crop.

Rabi Crops- These are grown in the winter season in the month of October, and harvested in the month of March. Wheat is the main Rabi crop.

The major agricultural practices involved in crop production and management are listed below:

Preparation of Soil Sowing of Seeds
 Addition of Manure and Fertilizers Irrigation
 Protection from Weeds Harvesting
 Storage
