Topic : Environment

Chapter In A Nutshell :-

- The sum total of all conditions prevailing in our surroundings (including one or more ecosystems) makes our environment. It sustains all life forms. We get everything from these surroundings – air, water, food, shelter, etc.
- Our environment has three main components – Natural, Human-made and Human.
- Natural environment encompasses all living things (biotic) and non-living things (abiotic) that occur or have occurred naturally on the earth's surface.
- Natural environment divided into three broad categories – Lithosphere, Hydrosphere and Atmosphere.
- Various components of environment interact with each other in a cyclic form. This relation between the organisms and their surroundings form an ecosystem.

- The environment created by the human being for its comfort including house, road, vehicles, etc, are called human- made environment.
