**ASSIGNMENT NO 1, SESSION 2020-21**

**Class : 6<sup>th</sup>**

**Teacher's Name: Mrs.Rekha Sharma (97960-66625)**

**Q. READ THE PASSAGE CAREFULLY AND ANSWER THE FOLLOWING QUESTIONS.**

The giraffe is the tallest of all living land animals. A male can go up to 18 feet and a female up to 15 feet .Such height enables them to escape the competition for ground level grass that exists among other leaf eaters. It also gives him a long range of vision. He takes the warning of the approaching enemy early.

Giraffes eat a variety of leaves ,but acacia leaves are their favourite diet. In spring, when many trees are not in leaf, they spend 80 per cent of the day eating. In summer, when trees are in full leaf ,they need only 15% .The rest of the time is spent in resting and quarrelling.

A giraffe's long neck is made up like that of man and most other mammals of only seven vertebrate bones are attached to one another with ball and socket joints. These make the neck flexible .It can run at 50km per hour.

Rising from a lying position is a problem for such a large animal. So it usually keeps standing even while it sleeps.

To reach water with such a long neck and legs a giraffe spreads its front legs wide apart.Then,it lowers its neck to drink. This awkward position makes it easy for the lion to attack it.

QUESTIONS:

A) **On the basis of your reading of the above passage, fill in the blanks with suitable words/ word.**

A giraffe is the (a) .....of all land animals. The height of a (b) .....giraffe can go up to 18 feet .The(c) .....of a female giraffe can be up to 15 feet.
